USDA announces details for the upcoming Census of Agriculture

WASHINGTON, Aug. 29, 2022 – America’s farmers and ranchers will soon have the opportunity to be represented in the nation’s only comprehensive and impartial agriculture data for every state, county and territory. The U.S. Department of Agriculture (USDA) will mail the 2022 Census of Agriculture to millions of agriculture producers across the 50 states and Puerto Rico this fall.

The 2022 Census of Agriculture will be mailed in phases, starting with an invitation to respond online in November followed by paper questionnaires in December. Farm operations of all sizes, urban and rural, which produced and sold, or normally would have sold, \$1,000 or more of agricultural product in 2022 are included in the ag census.

“Census of Agriculture data are widely used by federal and local governments, agribusinesses, trade associations, extension educators, and many others to inform decisions about policy and farm programs and services that aid producers and rural communities,” said NASS Administrator Hubert Hamer. “By responding to the Census of Agriculture – by being represented in these important data – producers are literally helping to shape their futures.”

Collected in service to American agriculture since 1840 and now conducted every five years by USDA’s National Agricultural Statistics Service (NASS), the Census of Agriculture tells the story and shows the value of U.S. agriculture. It highlights land use and ownership, producer characteristics, production practices, income and expenditures, among other topics. Between ag census years, NASS considers revisions to the questionnaire to document changes and emerging trends in the industry. Changes to the 2022 questionnaire include new questions about the use of precision agriculture, hemp production, hair sheep, and updates to internet access questions.

To learn more about the Census of Agriculture, visit www.nass.usda.gov/agcensus or call 800-727-9540. On the website, producers and other data users can access frequently asked questions, past ag census data, [partner tools](#) to help spread the word about the upcoming ag census, special study information, and more. For highlights of these and the latest information on the upcoming Census of Agriculture, follow USDA NASS on twitter [@usda_nass](https://twitter.com/usda_nass).
